

Keenan Finkelstein

Senior Product-Minded Software Engineer

I turn complex, rule-heavy workflows into clear Python and React products, then improve them through stakeholder feedback, validation, and production ownership.

Pensacola, FL | 850-619-0756 | keenanfinkelstein@gmail.com | linkedin.com/in/keenan-finkelstein

Product STAKEHOLDER CONTEXT INTO USEFUL WORKFLOWS	Python DJANGO APIS, AUTOMATION, AND DATA FLOWS	Simplify RECOVERED RULES AND PARITY CHECKS	Operate VALIDATION, RELEASES, AND SUPPORT
--	---	---	--

WHERE I FIT

OPERATING PROFILE

Senior software engineer and technical lead with experience delivering Python/Django and React products for complex operational workflows, modernizing long-running systems, and preserving important business behavior through explicit rules and validation. Strongest at turning stakeholder context into usable interfaces and APIs, simplifying brittle software without losing what matters, and carrying changes through release and production support.

TECHNICAL RANGE

CORE CAPABILITIES

Build Python, Django, REST APIs, React, TypeScript
Discover Stakeholder goals, operator context, workflow constraints
Simplify Legacy recovery, explicit rules, maintainable behavior
Validate Parity checks, diagnostics, releases, production support

HANDS-ON TOOLS

STACK

Python / Django / REST APIs / SQL / JavaScript /
TypeScript / React / React Native / AWS / Docker / C# /
Perl / Rust / Git

RECENT DELIVERY

EXPERIENCE

Full-Stack Software Engineer Sandpaper Marketing Pensacola, FL - Built custom web and mobile applications with React, React Native, Django, JavaScript, and SQL. - Converted stakeholder goals into usable product workflows, dashboards, APIs, and release-ready features. - Debugged application, integration, and data-flow issues; validated fixes and supported production releases. React / React Native / Django / SQL / Product Delivery	2024-Jan 2026
Software Engineer IV Elsevier Remote - Modernized a mission-critical 20-year Perl monolith for a scholarly document repository. - Built a Django/AWS bulk-ingestion workflow with parity checks, validation, and safer rollback paths. - Recovered undocumented business rules with original system designers to prevent regressions. Perl / Django / AWS / Legacy Modernization / Bulk Ingestion	2022-2023

EXPERIENCE CONTINUED

Senior Software Engineer and IT Manager

Regenerative Labs | Pensacola, FL

2020-2022

- Led software and IT operations across warehouse, lab, sales, and patient-data workflows during rapid growth.
- Architected a HIPAA-first platform with role-based data access, PHI/PII controls, and audit-ready workflows.
- Built barcode-enabled LIMS/WMS tooling, data partitioning, and runbooks for lab and warehouse operations.

HIPAA / Python / Django / Barcode Automation / LIMS/WMS

Senior Software Engineer and Manager

Action Mailing Service | Pensacola, FL

2017-2020

- Modernized production, fulfillment, and reporting workflows with Python, C#, WPF, SQL, and automation.
- Reworked a failing 32-bit production core while protecting continuity of the USPS CASS workflow.
- Protected financial and PII data while coordinating deadline-critical production support and recovery work.

Python / C# / WPF / PII / USPS CASS / Production Support

OPERATIONAL DEPTH

FIELD OPERATIONS

Field Operations and Maintenance Lead

Residential and commercial | Pensacola, FL | 2007-2017

On-site diagnostics and repair across electrical, plumbing, mechanical, and facility systems; property rehab, vendors, permits, and safety coordination.

United States Navy - Computer Field/Sonar Technician

Honorable discharged veteran

Qualified in complex shipboard technical systems and disciplined operational procedures; redrew major submarine system diagrams from memory.

PROOF OF RANGE

SIGNATURE BUILDS

Fullbleed Document Engine

Rust core | Python CLI/API | JSON contracts
github.com/fullbleed-engine/fullbleed-official

Deterministic HTML/CSS-to-PDF engine with reproducibility checks, structured JSON results, and diagnostics for human and automated workflows.

Principia

Python | assumption contracts

github.com/krflol/principia

Published Python package for declarative assumption contracts plus reusable semantic and behavioral validators.

Regulated Workflow Products

Django | React | internal tools

Software for publishing ingestion, fulfillment, healthcare operations, dashboards, integrations, validation, reporting, and production support.

Operating Lens

Good work starts by naming the real constraint, choosing a policy that fits the stakes, and making connected changes that prove themselves in use.

PROBLEM-SOLVING KERNEL

Understand

Name the user, workflow, hidden rule, and desired outcome.

Deliver

Ship the smallest useful step with clear interfaces.

Learn

Validate behavior, support the release, and improve from feedback.
