Data INGESTION, VALIDATION, AND REPORTING	Django APIS AND OPERATIONAL WORKFLOWS	Quality PARITY CHECKS AND DOCUMENTATION	Delivery PRODUCT THROUGH PRODUCTION SUPPORT
---	---	---	---

WHERE I FIT

OPERATING PROFILE

Senior Python/Django engineer with experience modernizing a long-running scholarly repository, building AWS-backed ingestion workflows, and delivering operational software across healthcare, logistics, and marketing. Strongest at turning ambiguous data and business rules into validated workflows, practical interfaces, and maintainable systems.

RECENT DELIVERY

EXPERIENCE

Full-Stack Software Engineer

2024-Jan 2026

Sandpaper Marketing | Pensacola, FL

- Delivered client-facing web and mobile products using React, React Native, Django, JavaScript, and SQL.
- Translated stakeholder goals into dashboards, APIs, integrations, data flows, and release-ready product features.
- Diagnosed application and data-flow issues, validated fixes, and supported production releases.

Django / SQL / APIs / Dashboards / Product Delivery

TECHNICAL RANGE

CORE CAPABILITIES

- Backend**
Python, Django, REST APIs, SQL, AWS
- Data**
Bulk ingestion, validation, reporting workflows
- Modernize**
Perl, C#, Python, recovered business rules
- Deliver**
Product, research, operations, and stakeholder collaboration

Software Engineer IV

2022-2023

Elsevier | Remote

- Modernized a long-running Perl system supporting a scholarly document repository.
- Built a Django/AWS bulk-ingestion workflow with parity checks, validation, and safer rollback paths.
- Worked with original system designers to recover undocumented business rules and reduce regression risk.

Python / Django / AWS / Bulk Ingestion / Data Validation

HANDS-ON TOOLS

STACK

Python / Django / REST APIs / SQL / AWS / Docker / JavaScript / TypeScript / React / Perl / C# / Git

EXPERIENCE CONTINUED

Senior Software Engineer and IT Manager

Regenerative Labs | Pensacola, FL

2020-2022

- Led software and IT work across lab, warehouse, sales, and patient-data workflows.
- Built HIPAA-oriented systems with role-based access, PHI/PII controls, and audit-ready operational workflows.
- Developed barcode-enabled LIMS/WMS tooling and supported day-to-day production operations.

Python / Django / Data Workflows / LIMS/WMS / Operations

Senior Software Engineer and Manager

Action Mailing Service | Pensacola, FL

2017-2020

- Modernized production, fulfillment, and reporting workflows using Python, C#, WPF, SQL, and automation.
- Reworked a failing 32-bit production core while protecting continuity of the USPS CASS workflow.
- Supported deadline-critical production recovery and PII-sensitive data workflows.

Python / SQL / Reporting / Automation / Production Support

OPERATIONAL DEPTH

FIELD OPERATIONS

Field Operations and Maintenance Lead

Residential and commercial | Pensacola, FL | 2007-2017

On-site diagnostics and repair across electrical, plumbing, mechanical, and facility systems; property rehab, vendors, permits, and safety coordination.

United States Navy - Computer Field/Sonar Technician

Honorably discharged veteran

Qualified in complex shipboard technical systems and disciplined operational procedures; redrew major submarine system diagrams from memory.

PROOF OF RANGE

SIGNATURE BUILDS

Fullbleed Document Engine

Rust core | Python CLI/API | JSON contracts
github.com/fullbleed-engine/fullbleed-official

Deterministic document engine with reproducibility checks, structured results, validation artifacts, and a documented Python-facing workflow.

Principia

Python | assumption contracts
github.com/krf10l/principia

Published Python package for declarative assumption contracts plus reusable semantic and behavioral validators.

Publishing Data Modernization

Django | AWS | ingestion

Modernization work for a scholarly repository using Django/AWS ingestion, recovered rules, parity checks, validation, and safer rollback paths.

Operating Lens

Good work starts by naming the real constraint, choosing a policy that fits the stakes, and making connected changes that prove themselves in use.

PROBLEM-SOLVING KERNEL

Understand

Recover the data model, metric, and user decision.

Validate

Make source assumptions and parity checks explicit.

Deliver

Document, release, support, and improve the workflow.
